

Sharetec Introduces Reimagined & Enhanced Mobile Banking Experience: Sharetec On-the-Go Mobile

FOR IMMEDIATE RELEASE – At the Fall 2024 Sharetec Users Conference in Frisco, Texas, Sharetec revealed its reimagined and enhanced mobile banking platform, [Sharetec On-the-Go Mobile](#). From its modern user interface to its extensive feature set and integration capabilities, Sharetec On-the-Go Mobile will undoubtedly boost member satisfaction and retention.

“With our new mobile platform, Sharetec credit unions will have the most comprehensive and future-forward digital banking app to offer members,” stated Katie Lange, Director of Product Management at Sharetec. “We know that more and more members want to bank from their mobile devices, so we left no stone unturned when adding and refreshing features that will make digital banking easier.”

In addition to a sleek, modernized UI, Sharetec On-the-Go Mobile boasts a robust feature set, with many improvements focused on ease of use. Within the app, members can easily access top functions by utilizing Focus Accounts and Shortcut Menus. Alerts and messages, found directly at the top of the screen, will continuously inform members of important account changes. These features, and more, including better visualization of money movement in and out of accounts, will speed up the mobile banking process.

Other noteworthy features include a faster, more reactive application and a dynamic help screen that provides members with quicker support, including click-to-call and direct message buttons. Additionally, members can prioritize their most used accounts in the customizable “Account View.” Users can denote account importance with a highlighted main account and customization of the account name.

Along with its standout functionality, Sharetec On-the-Go Mobile also comes with deep-rooted vendor integrations that make this digital banking solution even more powerful:

- **Larky nudge®** – With Larky, credit unions can quickly send out or schedule push notifications to communicate with mobile banking users instantly. Larky and Sharetec recently announced their enhanced partnership, which includes Larky nudge® Basic for all Sharetec On-the-Go customers.
- **SavvyMoney** – Sharetec On-the-Go brings SavvyMoney front and center on the main home screen with a new mobile widget, so members can immediately check their credit score and view applicable products and promotions.
- **Open Payment Network (OPN)** – To deliver an instant payment solution to our Credit Unions, Sharetec partnered with OPN, an industry leader in the TCH-RTP and FedNow Networks. With Sharetec On-the-Go's OPN integration, credit union members will be able to make instant payments for their bills, mortgages, payroll processing, and more.
- **ASA** – ASA Vault, an embedded app store within a CU’s mobile experience, will be available to all Sharetec On-the-Go customers in the coming year. This will provide members access to powerful FinTech apps and tools that can positively impact their financial lives and status.

“Sharetec carefully vets and selects best-in-class integrations that will truly address credit union and members' needs,” stated Lange. “By incorporating Larky, SavvyMoney, ASA, and others into Sharetec On-the-Go Mobile, our customers will possess a competitive edge and be able to transform how their members bank digitally.”

Current Sharetec partners are encouraged to contact their Account Relationship Managers directly to learn more about implementing Sharetec On-the-Go Mobile.
